Kinvent, leader in connected physical therapy solution, expands its U.S. reach with a renowned US Advisory Board

Miami, USA – Kinvent, a global innovator in connected physical therapy and sports technology, is excited to announce the formation of its US Advisory Board, marking a significant milestone in its expansion into the United States. This panel brings together renowned experts from health, sports, and technology sectors to co-create the future of rehabilitation and performance optimization.

Empowering Professionals Through Innovation and Collaboration

For the past eight years, Kinvent has supported rehabilitation and sports professionals worldwide by providing cutting-edge tools to assess progress and boost patient and athlete engagement. The United States represents a strategic growth market and a hub of innovation in health and sports, making it the ideal environment for this initiative.

“Our mission has always been to empower professionals with innovative solutions tailored to their needs,” said Athanse KOLLIAS Founder & CEO of Kinvent. “With the creation of our US Advisory Board, we aim to not only adapt to the American market but also redefine what’s possible in rehabilitation and sports performance through collaboration with some of the brightest minds in the field.”

About the US Advisory Board

The Kinvent US Advisory Board includes a select group of leading American experts whose insights will drive the company’s vision forward. The board members are distinguished professionals in their respective fields, including:

- [Meg Meurer Brossy](#)
- [Jody Bilney](#)
- [Ginger Gilmore](#)
- [Steve Mackell](#)

Their combined expertise will guide Kinvent’s efforts to deliver tailored solutions for the U.S. market while fostering innovation at the intersection of movement science, connected technologies, and patient engagement.

What this means for healthcare and sports professionals

This initiative underscores Kinvent's commitment to providing:

- Solutions specifically adapted to the unique needs of U.S. rehabilitation and sport professionals.
- Innovative tools inspired by the latest trends in American healthcare and sports performance.
- Opportunities for collaborative projects that push the boundaries of what's possible in connected physical therapy.

About Kinvent

At Kinvent, we are revolutionizing rehabilitation and physical therapy with cutting-edge technology that enhances patient assessment and recovery. Founded in 2017 by Athanase Kollias, our passion for biomechanics and innovation drives us to develop advanced measurement tools that help healthcare professionals track progress with precision and efficiency. Our product range includes force platforms, dynamometers, mobility sensors, and interactive solutions—providing real-time data for strength, balance, and movement analysis. These tools empower professionals in sports, hospitals, and physical therapy clinics to make informed decisions, personalize treatments, and engage patients like never before.

Driven by science, guided by data, and inspired by movement, Kinvent is shaping the future of rehabilitation worldwide.

Key figures:

- 80 employees
- Presence in +80 countries
- 65% of revenue international
- 10 connected sensors linked to a proprietary application
- 13,000+ equipped physical therapists
- 425,000+ patients
